Adult hide-away meets garden oasis at / Springhill Road

AG expertly assisted the completion of an exciting project for a new build house at Springhill Road, Moneymore. The project involved reclaiming ground that was previously woodland and transforming the space into a stunning garden feature with three tiers of landscaping, finished with railings and embedded spotlights. AG's Anchor Diamond® in Basalt was selected for the retaining walls, ensuring that the garden's landscaping was finished to a professional standard. This straight-split block offers speedy installation for retaining wall structures, owing to its dry-build nature and versatility in outdoor spaces. The architect was able to maximise the unique

trapezoidal shape of AG's Anchor Diamond® block to create a walling structure that curved seamlessly with the garden's landscaping. To achieve the desired height, geogrid was utilised which allows Anchor Diamond® block to be built up to 3m high (1.2m of retaining wall height can be achieved with no geogrid). A hot tub hut retreat was constructed in the top tier of the garden to provide a secluded and relaxing space to unwind. Anchor Wall Systems sent associates from its American team to Moneymore to view the finished project; the first of its kind, which highlighted the versatility of Anchor Diamond® blocks in constructing exquisite outdoor spaces for residential properties.

Contractor
Outdoor Services

AG are one of the largest suppliers of hard landscaping and building products – but staying as a tightly-run family business, with a well-trained and highly-skilled workforce, has allowed us to maintain a firm focus on product innovation and responsive, customer-driven service.

Everyone within our organisation shares a common focus: to develop products and solutions that enable a built environment that's both aesthetically pleasing and highly functional. With a proud history of market and manufacturing firsts, our engineering, design and sales teams work in close partnership with architects, designers and contractors to develop products that continue to challenge and lead industry standards.
